Popular in England -The recent bull of the Pope, parcelling out England into new diocesses and appointing Archbishops and Bishops to precide over them, seems to be arousing the spirit of til after the boat had been underweigh Protestant England. The English three miles. Without a moment's hesi-Church seem to be especially alarmed, or at least irritated by this open movement on the part of the Pope, this in-fringement on their rights. The Bishop of London, in a teny of an entree of the clergy, or the subject is flor and humanity holds the following language: holds the following language,

"The recent assumption of authority by the Bishop, of Rome, in pretending to parcel out this country into new dioceses, and to appoint archbishops indibishops to preside over them, without the consent of the Sovereign, is, a schismatical act, without precedent, and one the consent of the Sovereign, is a sonia-matical act, without precedent, and one which would not be telerated by the gov-erament of any Roman Catholic king-dom. I trust that it will not be quietly submitted to by our own, \* \* The dom. I trust that it will not be quietly submitted to by our own. \* The appointment of bishops to preside over new dioceses in England, constituted by a Papal brief, is virtually a dealat of the legitimate audicity of the British Sovereign and of the English episcopate in denial, also, of the validity, of our orders, and an assertion of spiritual jurisdiction over the whole Christian people of the realm. \*\* \* That step will. I am convinced, fend to sirengthen the Protestant Sciling of the people at large, and will cause some persons to heafute and draw back, who are disposed to make concessions to Rome, under a misting impression tillut she lips ablated somewhat of her ancient pretensions, and somewhat of her ancient pretensions, and that a union of the two Churches might possibly be effected without the enerifice of any fundamental principle."

The result of all this may be fo compel the dominant Church of England to do what it has before been gind: to do, make concessions to the Dissentors and dolle with them in an effort against a common enemy. If this is done, good may be brought about. But we trust that should she again be saved from total overthrow, by the self-denying cooperation of the dissenting churches of the Kingdom, she will not ngain in the day of her triumph forget the honest and good men through whose instrumentality she accures that trimmph.

IMMERSE SUPPLIES OF Goto. Three steamers arrived at New York last week, with California gold dust. The Cherokeo's gold dust amounts to two millions -and the amount, chiefly in the hands of the massengers, brought by the Genrunn the City, to New York, and by the Alabama, at New Orleans, will reach to at least a million. more. According to advices, two millions and a half, destined for the United States, were at Panama when the Cherokee left Chagres. Including the ship ments to England and Valparaiso, says the Herald? the exports of gold dust from Californie, within a month, dating back from the last arrival at Panama will exceed eight millions of dollars. If such an extraordinary exportation were kept up, a hundred millions of gold would be thrown into the market of the world during the year, exclusive of the large anicuals carried into Moxico. But this

can hardly last. SORIDO AT TAMMANY HALL-ME Henry Smals, an inmate of Tammany Hall, about 8 o'clock yesterday morning, committed spicide by shooting himself with a pistol while in a temporary insane state of mind. Mr. Staats has been a boarder at the hotel since the 24th of April last, and during that time has exhibited symptoms of slight insanity. Yesterday morning he stated to Mr. Colton, the clerk, that he intended visiting his aunt, who resides in the city, and asked permission to mave his trunk, after paying his bill. This was of course granted by Mr. Collen, who noticed that deceased acted strangely, and was apparently insane. He soon id about 8 o'clock returned, went to his room, and soon after was found lying dead upon the floor. He and placed himself before a mirror, put the muzzle of a pietel in his mouth and fired, he fell backwards, and his head striking upon a trunk his skull was exteneively fractured. It is somewhat remarkable that the report of the pietel was not heard by any person in the house. The Coroner held an inquest and a verdict of self-destruction with a pistol, was rendered. Deceased was a native of this State, 40 years of age .--Com. Ade.

> Quire a Mierake .-- Robert Stean, a resident of Middletown, Ohio, was a-mong the passengers on the ill-fated Anthony Wayne, when she blew up on Lake Erie. A body, answering to his description, was found floating on the Linke. It was buried at Sandusky, and a monument erected to his memory by friends. A few days since, the aforesaid Robert visited the grayeyard, and read sucred to his own memory, &c. and immediately posted off to his friends, and after some little argument, assured them that he was not dead, but actually alive and kicking, although covered with sears. It appears that he was picked up in the Lake by a hoat, and conveyed to Detroit, where he received medical treatment, and was enabled once more to return. Orders were immediately despatched to Sandusky, to have the monumont removed from over his supposed remains. . :

Execution of Jones. - This individual expiated the crime of which he was convicted, on the gallows at Mount Carmiel, on the 11th ult., in the presence of some six or eight thousand persons, Affor the criminal was launched from the platform, by some means or other, one of his arms got loose and he violently clutched the rope around his neck, and struggled for some moments to get it off, but the fall was too much, and the ! nosee had drawn to fight. After strug-gling a while his arm fell by his side, and life was extinct .-- Char: (III.) Globe

The press is so universally read in this country, that it affords facilities for trade, com merce, and every day trunsactions of the most important character. In Philadolphia it would be difficulty discover an individual who does not pregularly read a daily newspaper. The merchant in his counting room, the clergy man, in his study, the storekeeper, the manufacturer, the day-laborer, the matron and the maid, all pureus one or more public journals and thus inform themselves of the events of the day, Business men, we repeat, having discovered this, finding the press so widely dissominated and so universally sought after, now rewort to it much more than formally as a means of communicating with the multitude, and announcing the various kinds of merchandise they have for sale. It is possible for an old established house to get along for a few years quietly and comfortably, without even a sign, a card or an advertisement. The customers of many years standing will find their way to the counting room, and make their purchases. Gradually, however, even these will drop off one by one, tempted by the enterprise of some more nerive house, or surprised hate a purchase cisewhere by a newspaper card or advertisement. And thus, as the old generation passes nway, the house, however well established, will find itself sinking gradually into decay, its old patrons disappearing from various causes, and no new once attracted to its doors. But, to those who desire to make or increase business, the silent, sleepy, and stand still policy will not answer. It is not many to the times," nor in conformity with the spirit of the day. Our attonsion has been called to this ysubject just now by the perusal of a capital essay on advertising from the pen of an a-ble contemporary. Horace Offency.— Phil. Inq.

SAGACITY AND FIRETITY OF A Dogthe following incident:-One day last week, the wife of Mr. Dickinson, a werthy farmer of that town-all the mem bers of the family being absent but hersolf—had occasion? to sich fout of the house on an errand, and on her return she found a man on the floor, and a large Newfoundland day, a favorite in the lamily, was upon him holding him down. Mrs. Dickinson fold the man he had been stealing. He promptly denied it. She tried to call the dog off, but could now that the remember of the could not had stolen anything the dog would not lot him go till he gave it up. After same further purley, the dog holding on with a firm grip, the man took a silver spoon from his pocket, which he had taken from the house. At the sight of the spoon "Tiger" made some positive demonstrations of displeasure, and was with difficulty kept from injuring the thief. However, as soon as the speen was thrown upon the floor, the dog let go, and the fellow was allowed to leave the premises. Such a dog is worth having .- Lynn Bay State.

A FATHER'S RIGHT TO HIS CHILD. A case has been on trial recently before the Supreme Judicial Court at Augusta Me, which involves the question as to the right of a parant to dispose of the custody of his child. A Mrs. Nancy Farnsworth brought an action of repley in to recover possession of a child of Dr. Richardson, which she alleged had been given her by both parents when the child's mother was on her death bed .-She adduced the declarations of the father at the time of his wife's death, Nonle and Witty Reply.—In 1516, Phillip 11, sent the young Connetable de Castile to Rome to congratulate Sextra the Fifth on his advancement. THE FIRST ARREST .-- Three supposed fugitive slaves were brought down on the ateamer New England, a trip or two since. They were arrested in the country back of Quincy, Illinois, and at the time of their capture were making tracts for the Canadas. We learn they had been absent from their owners some time, and up to the time of the passage of the fugitive slave bill, deemed themselves safe with the Mississippinione between themselves and their owners.

This is the first arrest in this section under the provisions of the fate fugitive slave law ... SI Louis Int. 4th.

TO THE LADIES.

WASHING BLEACHING AND CLEANS—
ING FLUID, the greatest labor-saving articles yet discovered. By its use, washing unactimes and boards are entirely dispensed with, and not one quarter the labor is required to do the washing of a family.

The Pluid is a chemical compound of sufficient strength to extract all foreign substances from the clatt, by simply bodding a small quantity of it with the clattes, and without the slightest injury to the most delicate fabric.

The expense is not more than that of the scap collectify used, and besides this it will be seen that the great wear and tear of clothing consequent upon the old method of hard mishing upon a board, and the use of the pounding barrel, is wholly avoided, and animacates aring is thus made. It is emplatically the female's friend.
